

15 clients hold valuable local data, but weaker-device clients are the majority.

5 stronger-device clients

+

10 weaker-device clients

A: Exclude
weak clients

5/15 data

fastest, but loses
non-IID coverage

B: Full inclusion
all clients rate 1.0

15/15 data

direct baseline, but
often infeasible

C–E: Submodel
inclusion

weak clients rate 1/8

15/15 data

practical inclusion path
